Professional Summary

Software Developer and Project Manager with experience spanning full-stack web and mobile development, API integration, GIS/data-driven projects, digital marketing, and cross-functional project coordination. Experienced in translating business requirements into technical solutions, coordinating developers and stakeholders, managing project workflows, and supporting end-to-end delivery. Strong technical background in React, TypeScript, PHP, Laravel, MySQL, REST APIs, React Native, Git, and Linux-based deployment. Combines hands-on development experience with project planning, client communication, documentation, and team coordination.

Core Competencies

Project Management | Technical Project Coordination | Agile/Scrum | Project Planning | Requirements Gathering | Client Communication | Cross-functional Team Coordination | Software Development | Full-Stack Development | API Integration | Web Development | Mobile Development | Database Design | Technical Documentation | QA & Testing | Troubleshooting | Deployment & Maintenance

Technical Skills

Frontend: React.js, TypeScript, Vite, React Native, HTML, CSS, JavaScript, Material UI, Redux, Context API, Shopify Liquid

Backend: PHP 8+, Laravel, RESTful APIs, Node.js, CodeIgniter, Kotlin

Databases & Storage: MySQL, MySQL Workbench, SQLite, MinIO

Messaging & Integration: RabbitMQ, API Integration, Firebase Push Notifications

DevOps & Infrastructure: Linux, aaPanel, Git, GitHub, SSL, Cron Jobs, CI/CD, Server Monitoring, Log Debugging

Development Tools: Visual Studio Code, Android Studio, Xcode, Postman, npm, Yarn

Project & Collaboration: Notion, ClickUp, Agile/Scrum, Project Planning, Client Coordination, Cross-functional Collaboration

Professional Experience

CLIBASE TECHNOLOGY, INC.

Software Engineer

January 2026 – March 2026

- Developed and maintained business applications using Kotlin, Android Studio, JavaScript, and web-based technologies.
- Contributed to point-of-sale (POS) and mobile POS (MPOS) solutions, supporting application functionality and business workflows.
- Worked with CodeIgniter, PHP, Node.js, and Ionic/Capacitor-based technologies across web and mobile development tasks.
- Investigated Bluetooth thermal printer connectivity and printing issues in mobile POS environments.
- Worked on a QR code-based access scanning application integrating Android functionality with web-based interfaces.

SEER AI

Project Manager

January 2026 – July 2026

- Managed projects involving GIS, property data, parcel research, and data-driven workflows for U.S. county-level projects.
- Coordinated project requirements, priorities, task assignments, and deliverables across technical and research-oriented workflows.
- Worked with county parcel and GIS datasets to support project discovery, validation, and data-related requirements.
- Coordinated work across multiple U.S. locations and county datasets, including projects involving Alabama, Alaska, Arizona, and Georgia.
- Used project management and documentation platforms including Notion and ClickUp to organize tasks, requirements, and project information.
- Collaborated with technical team members on API-related workflows and the Geodesic console/Python-based tooling.
- Communicated project requirements and progress between stakeholders and execution teams.

Bryan Paulo Lopez

Software Developer | Project Manager

Professional Experience

MY BIZ NICHE

Project Manager

July 2026 – September 2026

- Managed digital marketing and web-related projects, coordinating tasks, timelines, deliverables, and communication across team members.
- Coordinated SEO, web development, and PPC-related workflows to support client project requirements and business objectives.
- Worked with team members across SEO, development, and digital marketing functions to maintain project progress and handoffs.
- Organized project priorities and communicated requirements to support efficient execution of ongoing client work.
- Supported website and digital marketing initiatives involving SEO, web development, and online advertising.
- Maintained project coordination in a remote work environment using digital collaboration and productivity tools.

TEO

Software Developer → Senior Software Developer

July 2024 – January 2026

- Developed and maintained web, mobile, and desktop applications using React, TypeScript, React Native, PHP, Laravel, and Electron.
- Built and integrated RESTful APIs using Laravel and PHP, including authentication, queues, and backend services.
- Designed and maintained MySQL databases and schemas using MySQL Workbench, with focus on data structure and application performance.
- Developed responsive and modular frontend interfaces using React, TypeScript, Vite, Material UI, Context API, and Redux.
- Built cross-platform mobile applications using React Native for Android and iOS.
- Implemented real-time communication and event-driven workflows using RabbitMQ publisher-consumer patterns.
- Integrated MinIO for object storage and supported local server and SQLite environments for Electron applications.
- Managed Linux-based deployments using aaPanel, including SSL configuration, cron jobs, server maintenance, and application deployment.
- Worked with Git-based version control, branching strategies, merge handling, and collaborative development workflows.
- Contributed to projects involving smart-city systems, flood monitoring, air-quality monitoring, mapping, and emergency-response data.
- Collaborated with clients and internal teams to understand requirements, troubleshoot technical issues, and deliver software solutions.
- Promoted to Senior Software Developer on May 16, 2025, after demonstrating strong technical delivery and contributing to team success.

WINNING VIDEO

Assistant Project Manager

2020 – 2022

- Coordinated project tasks, schedules, and deliverables to maintain alignment with project objectives and client expectations.
- Monitored project risks and issues and helped identify solutions to minimize impact on timelines and deliverables.
- Supported project planning, task coordination, and communication between team members.
- Assisted with maintaining project progress and ensuring assigned tasks were completed according to requirements.

OFFSHORITY

Web Developer

2019 – 2020

- Developed and maintained responsive websites and web applications using HTML, CSS, and JavaScript.
- Developed and customized Shopify themes using Liquid, HTML, CSS, and JavaScript.
- Collaborated with designers to translate UI/UX designs into functional, responsive, and high-quality web interfaces.
- Troubleshoot frontend issues and supported ongoing website maintenance and improvements.

Education

Bachelor of Science in Information Technology

Lyceum of the Philippines University 2016 – 2019

Web Development Training

KodeGo Bootcamp 2023 – 2024
